

OUTCOMES OF THE ON-TRACK EVALUATION

Based on the evidence provided, Hincks Avenue Primary School is On-Track to ensure effective implementation of the ESR Directions.

The Review Panel found that Hincks Avenue Primary School has established a clear vision, direction, processes and structures to realise evident improvement since the External School Review in 2015.

The Principal has provided effective educational leadership for the staff through building a culture of high expectation for all students at the school. Her instructional leadership approach and strategic intent have provided solid foundations for these enhanced expectations. Higher-level accountability exists across all levels of the school.

Learning data and perception data is collected and used with a greater level of coherence and intent across the school. Both datasets inform the school and classroom strategies to be implemented and refined as the improvement work is progressed. Both datasets verify improvement is being realised.

It was evident that staff have risen to the challenge of maintaining high expectations for the students at Hincks Avenue Primary School and this is to be commended. They have demonstrated higher levels of internal accountability for improved student learning, professional practice and commitment to working collaboratively to implement the planned changes.

The Review Panel considered the school's capacity to effectively monitor and evaluate its effectiveness and gathered sufficient evidence to verify this as an aspect of its improvement effort since 2015. Through discussions with school leadership, staff and students, there was sufficient evidence presented to verify that the school is working strategically to bring about improvement in a coherent and systematic way.

The Principal will continue to work with the Education Director to implement the findings of the ESR Report (August 2015) to a deeper level of consolidation.

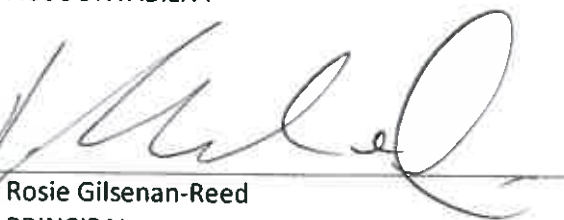

Based on current performance, Hincks Avenue Primary School will be externally reviewed again in 2019.
